## How to Upgrade CS100/CS101 Two Way Radio

- 1) Run CFU\_V1.01a.exe to install the upgrading tools.
- 2) Then run the upgrading software, such as duouble clicking the shortcut icon.
- 3) Choose Radio Type as CU600, set the right serial port and baud rate
- 4) Open the \*.bin file, and connect the programming cable to the wanted radio
- 5) Power on the radio, and then click "E.P" (Erase, Program).

! Pay attention to keeping the cable connected stably and the radio is power on all the upgrading period.
