

DOWNLOADING FIRMWARE UPDATES TO THE CS580

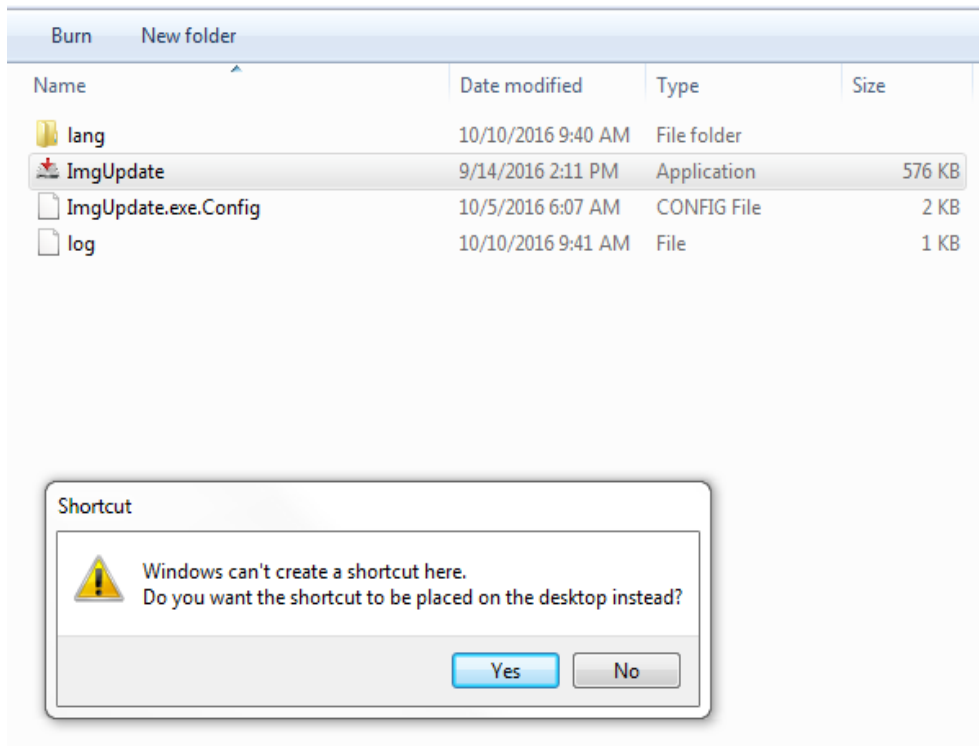

1. Create a subdirectory called BFD_UPDATE at the following location: computer > OS(C) > Program Files > BFDX > BFP_UPDATE. If BFDX subdirectory does not exist create one.
2. From our website get the following programs and put it in the subdirectory. After putting them in the directory your subdirectory should look as follows:

Name	Date modified	Type	Size
lang	10/10/2016 9:40 AM	File folder	
ImgUpdate	9/14/2016 2:11 PM	Application	576 KB
ImgUpdate.exe.Config	10/5/2016 6:07 AM	CONFIG File	2 KB
log	10/10/2016 9:41 AM	File	1 KB

3. Add the new firmware to that directory also.
4. Highlight ImgUpdate and right click your mouse and you should get the following:

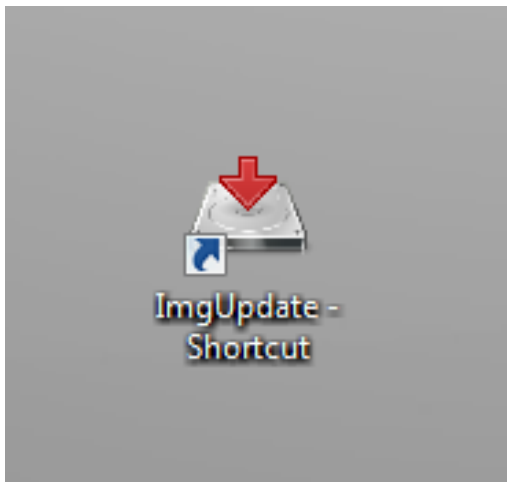

5. Click on “Create shortcut” and you should get the following:

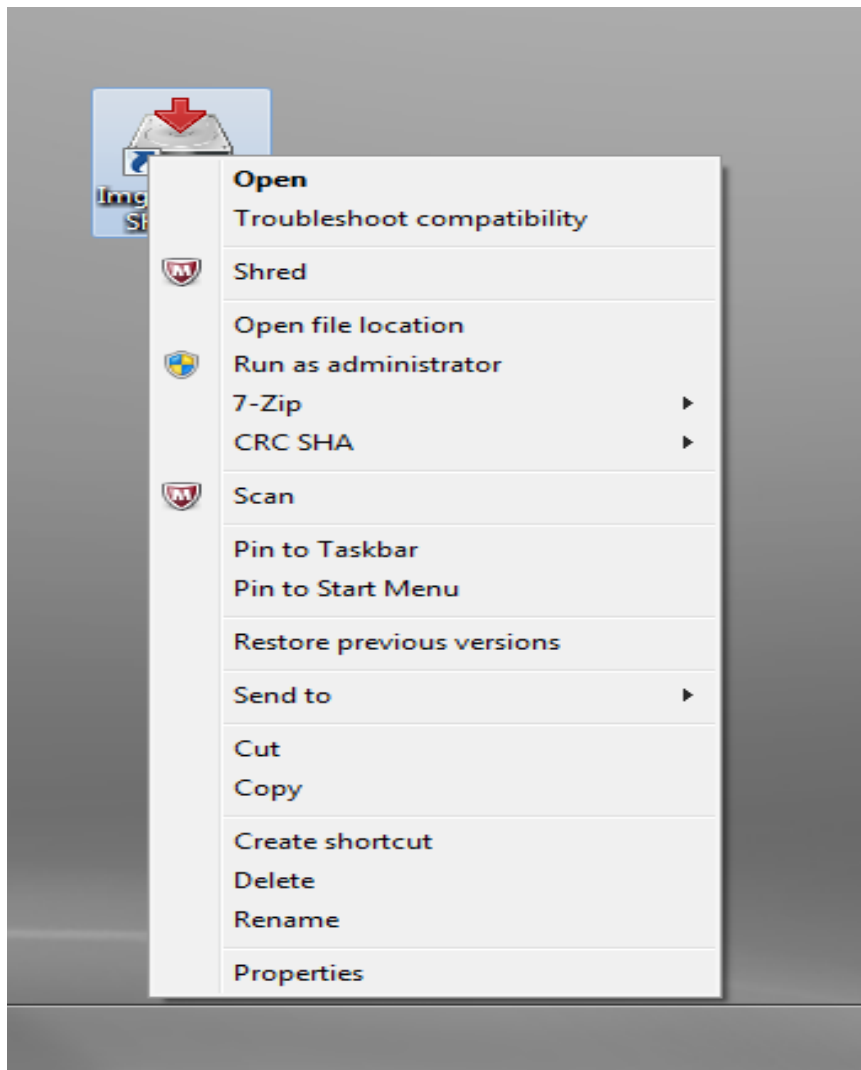

6. Press Yes and you should get a shortcut on your desktop.

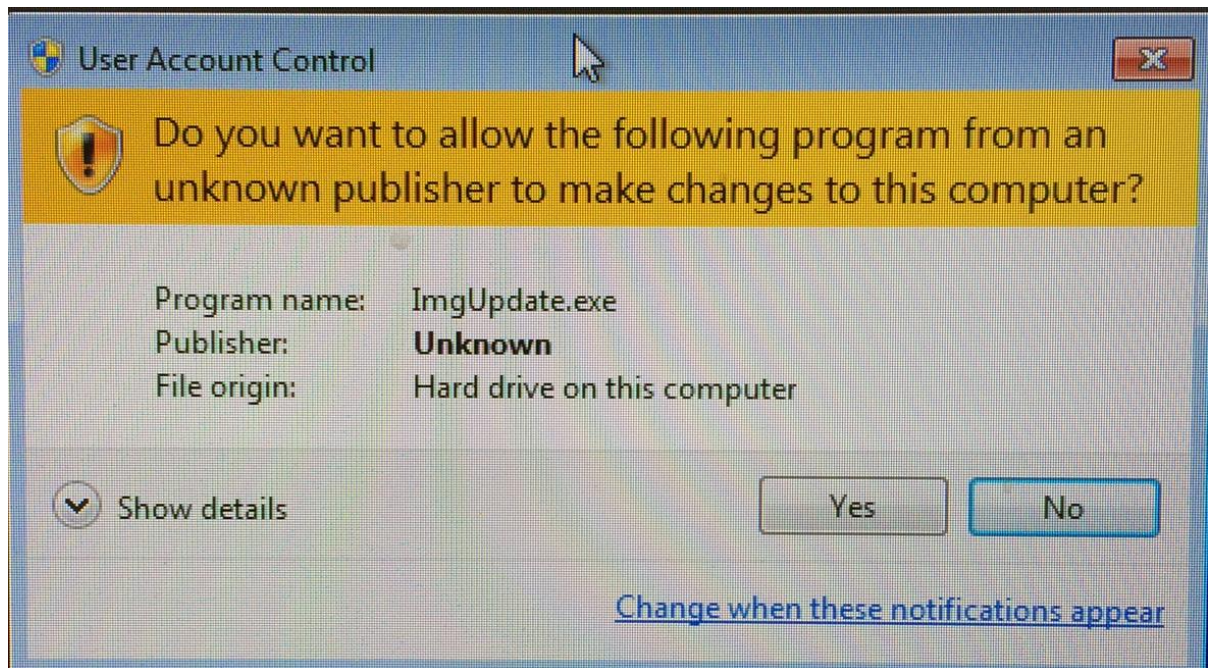

7. Your desktop should have the following ICON:

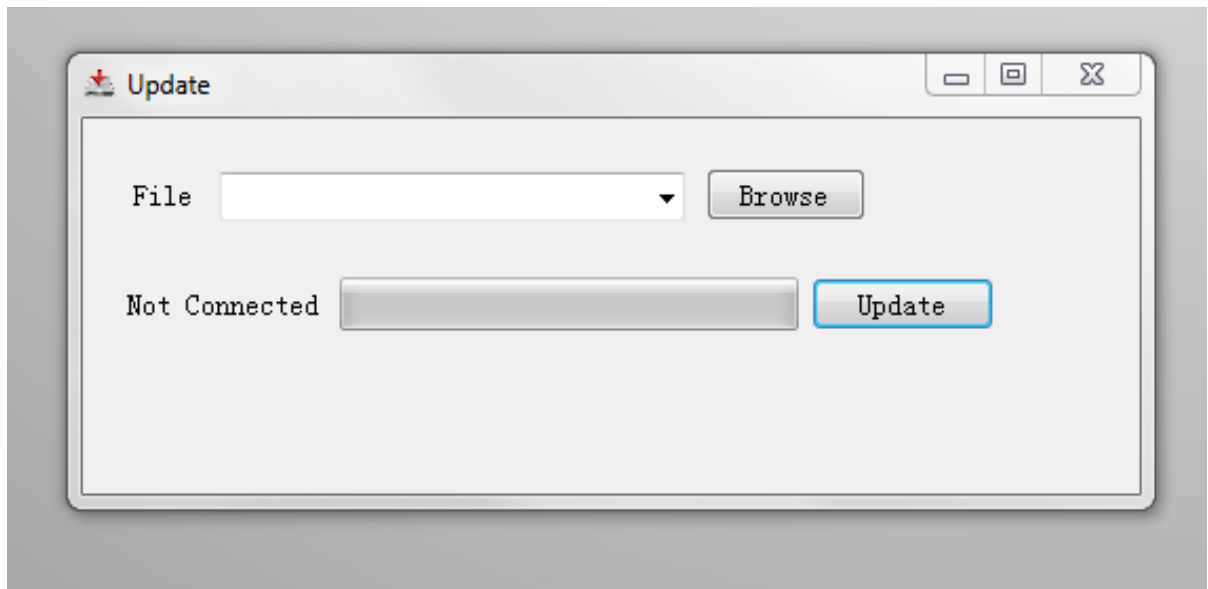

8. Highlight the ICON and right click and you should get the following:

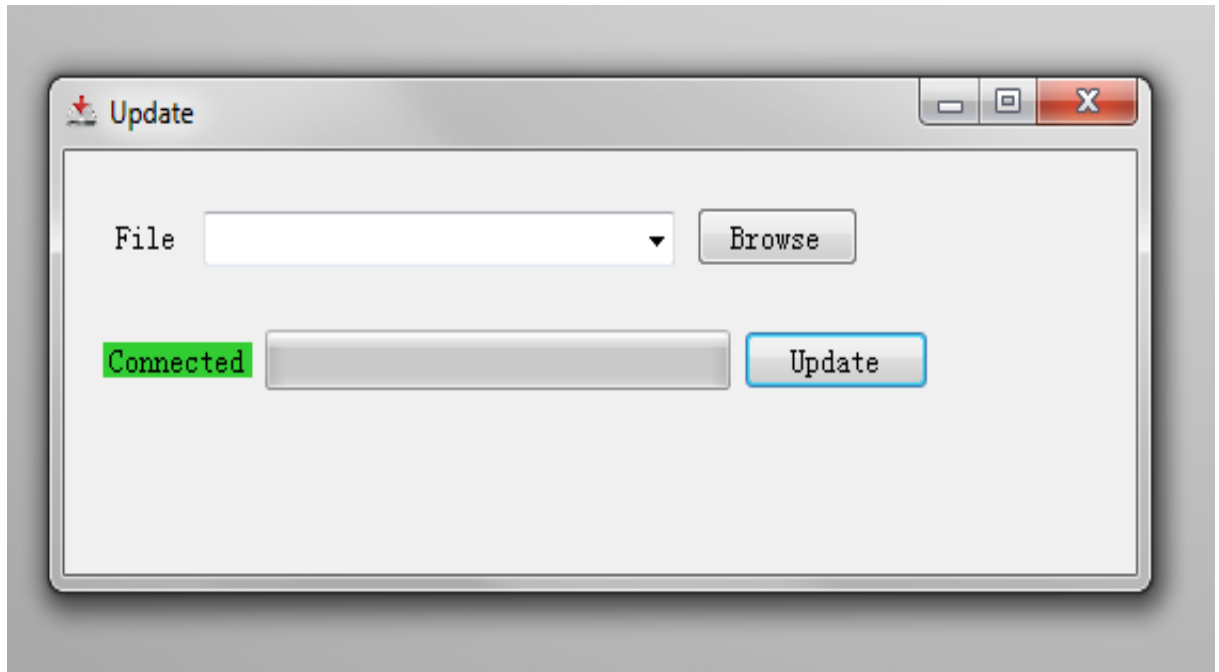

9. Click “Run as Administrator” and you should get the following:

10. Press the "Yes" key and you should get the following:

11. Press the top side key and while it is pressed turn on the power. The LED should turn orange and the screen should be blank and the program should now look as follows:

12. Browse to the new firmware that should already have been loaded into your computer and then press the “Update” key and the program should now download the new file into your radio.
13. After the new firmware has been loaded turn the radio off and then turn on and you are now ready to use the radio.
